

We need the password to get the flag, that is written at line 18 in the Python file as HEX. We need to convert the characters to ASCII. Commands :

```
python level1.py
```

```
# Please enter correct password for flag: ( "4ec9" )
```

```
Welcome back... your flag, user:
```

THE FLAG : picoCTF{tr45h_51ng1ng_9701e681}

~Z4que
