

```
# In this challenge, we need to go to  
https://jupiter.challenges.picoctf.org/problem/60915/robots.txt, where we can  
find :  
    Disallow: /8028f.html
```

```
# We delete "robots.txt" and enter "8028f.html" and we found the flag
```

```
# THE IDEA : What is robots.txt?  
# "robots.txt" is a standard file used by websites to tell crawlers (such as  
Googlebot) which pages they can and cannot visit. The structure of such file you  
can see in this example
```

```
THE FLAG : picoCTF{calculating_Mach1n3s_8028f}  
~Z4que
```
