

# We can find the 5 parts of the CTF :

1. Inspect the page(CTRL+U), there is a comment on the bottom;
2. "mycss.css", there is part 2;
3. "myjs.js", we got the message : "/\* How can I keep Google from indexing my website? \*/", so we need to use "robots.txt" ->  
"view-source:http://mercury.picoctf.net:39698/robots.txt". Here we find part 3;
4. "# I think this is an apache server... can you Access the next flag?" ->  
"view-source:http://mercury.picoctf.net:39698/.htaccess", part 4;
5. "# I love making websites on my Mac, I can Store a lot of information there." -> "view-source:http://mercury.picoctf.net:39698/.DS\_Store", part 5;

THE FLAG : picoCTF{th4ts\_4\_l0t\_0f\_pl4c3s\_2\_l00k\_fa04427c}
