

```
# Command :  
    steghide extract -sf atbash.jpg ( + enter )  
  
# When you get an image, I recommend you to see the instructions on  
"https://www.georgeom.net/StegOnline/checklist". Now we got a string :  
    # krxlXGU{zgyzhs_xizxp_zx751vx6}  
  
# We will decode it with Atbash Cipher ( "https://www.dcode.fr/atbash-cipher" )  
  
THE FLAG : picoCTF{atbash_crack_ac751ec6}  
~Z4que
```
