

```
# When we run the Python script and select the option b), we get :  
    # Oops! I must have misplaced the print_flag function! Check my source code!  
  
# If we open the file, we see at line 69 just a print message. replace it with  
"print_flag()" function  
  
THE FLAG : picoCTF{7h3_r04d_l355_7r4v3l3d_ae0b80bd}
