

I connected to the server twice : the first time when I connected the server, I answered only with Rock (R) and I observed that the seeds and the choices are the same. I saved the answers in a txt file, then I connected again to the server and I got the message :

The image shows a terminal window on the left and a text editor on the right. The terminal window displays a rock-paper-scissors game log. The text editor shows the same log, but with the first few lines highlighted. The terminal window also shows a command prompt and a message about the flag.

```
You won! Consecutive wins: 2
I chose S based on 2806643141
Please choose: R / P / S
>>>^C
----- Let's play rock, paper, scissors!
----- Beat me 10 times in a row to win the flag!

Please choose: R / P / S
