

You're investigating a critical remote code execution in a widely used Java logging library disclosed in December 2021 and nicknamed "Log4Shell". Find its official CVE entry on the National Vulnerability Database (NVD). On that NVD page, read the CVSS v3.1 Base Score. Submit both values in the flag. Example: CSCTF{CVE-2019-40401-5.0}

THE FLAG : CSCTF{CVE-2021-44228-10.0}
