

```
# If we decompile the file online with https://dogbolt.org/ and BinaryNinja, we can find the argument at line 102 :
```

```
    # else if (strcmp(argv[1], "Hello!"))
```

```
# So, we have to run the following commands :
```

```
    chmod +x run
```

```
    ./run Hello!
```

```
