# There can be run Linux commands in that box :

We are interested to "cat flag.txt", but here is the problem : if we use spaces, we get :

So we cannot run directly "cat flag.txt"

There is a trick, we can use instead : "8.8.8.8|cat${IFS}flag.txt"
$ {Ifs} is a special variable in BASH that defines the characters used to separate the words in the command line.

THE FLAG :
CTF{89e9c4db190b3626371a6592030bd274f1821cb87c1fad430a8396bb7fda36c8}
