```
# We have to use :
      git branch -a

# To see all the branches from the repository. We get something like :
      # feature/part-1
      # feature/part-2
      # * feature/part-3

# Now we use :
      git checkout feature/part-n

# To change the branch. IF we change it, we can see 1/3 part of the flag in
"flag.py" each time

THE FLAG : picoCTF{t3@mw0rk_m@k3s_th3_dr3@m_w0rk_798f9981}
